When trying to viewcvs diffs like:

http://svn.gnome.org/viewcvs/tracker/trunk/src/trackerd/trackerd.c?limit_changes=100&r1=563&r2=5

I get the following error:

```
An Exception Has Occurred
Python Traceback
```

```
Traceback (most recent call last):
```

I haven't tried any other browser but Epiphany. Please confirm that you get the same problem.

I occasionally see this happen. Generally, if I wait about

Re: Trouble with viewsvn diff views

five seconds and do a Shift+reload, the problem goes away.
I have no idea what causes it.

Thanks for the workaround; it works...
