Hello

On Sun, 2007-08-05 at 02:10 -0700, Mark Hull-Richter wrote:

I'm not sure what caused this, but suddenly my keyboard shortcuts for switching workspaces and moving windows to other workspaces are not working. Most of the others are still working (except <alt>x to log off, which never worked), but these seem to be gone.

Can I restore them some way other than logging out and back in or manually resetting all of them?

Check under System->Preferences-> Keyboard Shortcuts

Thanks.
