2007/12/18, William Case <billlinux@xxxxxxxxxx>:

Hi;

I am trying to create a menu launcher for vim. I want the command to be something like 'vim --run-in-terminal' but I can't remember or find the command equivalent to 'run-in-terminal'.

Help or reminder appreciated.

I guess you could use

`gnome-terminal -e vim`

if you want to run it in gnome-terminal
