```
# Open nautilus as root from user account
# file name: RootBrowse

sudo -K
if zenity --entry \
  --title="Browse files as root" \
  --text="Enter your user _password:" \
  --entry-text "" \
  --hide-text
then $1 | sudo nautilus --no-desktop --browser \
```

that would need sudo -S, see man sudo

Not sure where you'd expect \$1 to be defined.

```
1> /dev/null 2> /dev/null
else zenity --error --text="Sorry, wrong password";
exit 1
fi

# End
```
