Is gnome-volume-manager running when you connect removable drives?

Yes:

```
$ ps -aux | grep gnome-volume-manager  
pmatos 5466 0.0 0.6 19616 6536 ? Ss 12:53 0:00  
gnome-volume-manager --sm-disable
```

With this running, I can connect whatever and nothing happens.
