Dear Sir,

I have installed the glib and check as below. However, I get the error about the glib version while install gtk. Does anyone know the problem?

```
solaris <mailto:root@jlgis-gamma> # pkginfo -l SMCglib
PKGINST: SMCglib
NAME: glib
CATEGORY: application
ARCH: sparc
VERSION: 2.14.1
BASEDIR: /usr/local
VENDOR: The GLIB Project
PSTAMP: Steve Christensen
INSTDATE: Apr 16 2008 17:26
EMAIL: steve@xxxxxxxxxxxxx
STATUS: completely installed
FILES: 959 installed pathnames
169 shared pathnames
200 directories
13 executables
45019 blocks used (approx)
```

```
checking for GLIB - version >= 2.12.0... no
*** Could not run GLIB test program, checking why...
*** The test program compiled, but did not run. This usually means
*** that the run-time linker is not finding GLIB or finding the wrong
*** version of GLIB. If it is not finding GLIB, you'll need to set your
*** LD_LIBRARY_PATH environment variable, or edit /etc/ld.so.conf to point
*** to the installed location Also, make sure you have run ldconfig if that
*** is required on your system
***
*** If you have an old version installed, it is best to remove it, although
*** you may also be able to get things to work by modifying LD_LIBRARY_PATH
configure: error:
*** GLIB 2.12.0 or better is required. The latest version of
```

problem installation gtk

\*\*\* GLIB is always available from <ftp://ftp.gtk.org/pub/gtk/>.

Thanks,

Isaac Chan
