Hi Everyone!

Last time I posted the Quota Hash Abstraction for 2.4 somebody suggested doing it for 2.6, because it "might be interesting", so I thought, give it a try, and here it is ...

please, if somebody has any quota tests, which he/she is willing to do on this code, or just want to do some testing with this code, do it and send me the results ...

this patch requires the quota fix done by Jan Kara, otherwise quota would not work at all ...

TIA,
Herbert
