Hey,

I setup a test6 kernel without module support. I did a make install and got:

```
Kernel: arch/i386/boot/bzImage is ready
sh /usr/src/linux-2.6.0-test6/arch/i386/boot/install.sh 2.6.0-test6
arch/i386/boot/bzImage System.map ""
/lib/modules/2.6.0-test6 is not a directory.
mkinitrd failed
```

How can I fix this?

Thanks

Kevin Breit
