Subject: [2.4 patch] fix a compile warning in InterMezzo file.c

I got the following warning in 2.4.23-pre3:

<-- snip -->

...

```
gcc-2.95 -D__KERNEL__
-I/home/bunk/linux/kernel-2.4/linux-2.4.23-pre3-full/inclu
de -Wall -Wstrict-prototypes -Wno-trigraphs -O2 -fno-strict-aliasing
-fno-common -pipe -mpreferred-stack-boundary=2 -march=k6 -nostdinc -iwithprefix
include -DKBUILD_BASENAME=file -c -o file.o file.c
file.c: In function `presto_open_upcall':
file.c:64: warning: `rc' might be used uninitialized in this function
```

...

<-- snip -->

The patch below (already included in 2.6) fixes this warning.

Please apply
