Hello

Not sure if this is the correct place to ask, I compiled my own kernel, nothing fancy, mostly default stuff + some additional device drivers but after trying to load the kernel I end up with the following error

Failed to load transform for crc32c

Testing hmac_md5

Test 1:

9294727a3638bb1c13f48ef8158bfc9d

Pass

AT THIS POINT IT HANGS

This is redhat enterprise 3.0, I was trying a couple 2.6.X serie kernels and the error was the same each time, I was also trying to exlcude crc32 options from kernel but it didnt help, I was not able to find the resolution on google, so here I am asking for help, thanks

--

Sincerely MA
