Hi,everyone:

I have a strange problem about pty's number.

When I telnet or rsh into my server,I get a failed with message "All network ports in use." But when I execute "sysctl -algrep pty",the result I getting is "kernel.pty.nr=3D267 kernel.pty.max=3D999" (999 is my setting value).

Could anybody tell my why?
