Happily. I'm of the opinion the "ident whacking" callback isnt justified, only one driver has a need for it and that driver can do it in the iops hook.

> - *fix coding style and whitespace damage*

Yeah

> - *kill useless DECLARE_ITE_DEV macro*

I'd prefer to keep it (there are likely to be some related devices from the databook)

> - *add __init to it8212_ide_init()*

Good point - will fix

-
