

Compile error in 2.6.10-bk3 in floppy.c

I get the following error building 2.6.10-bk3:

```
drivers/block/floppy.c: In function `init_module':
drivers/block/floppy.c:4598: error: syntax error before "UTS_RELEASE"
make[2]: *** [drivers/block/floppy.o] Error 1
make[1]: *** [drivers/block] Error 2
make: *** [drivers] Error 2
```

-bk3 (and -bk2) have a patch that removes
#include <linux/version.h>
from floppy.c, which apparently makes UTS_RELEASE undefined.

Putting the #include back in fixes the error.

I can provide config/machine info if needed.
