make mandocs fails with these errors in 2.6.10-bk2 :

```
juhl@dragon:~/download/kernel/linux-2.6.10-bk2$ make mandocs
DOCPROC Documentation/DocBook/kernel-api.sgml
docproc: /home/juhl/download/kernel/linux-2.6.10-bk2/drivers/net/net_init.c: No such file or directory
/bin/sh: line 1: 4845 Segmentation fault
SRCTREE=/home/juhl/download/kernel/linux-2.6.10-bk2/ scripts/basic/docproc doc
Documentation/DocBook/kernel-api.tmpl >Documentation/DocBook/kernel-api.sgml
make[1]: *** [Documentation/DocBook/kernel-api.sgml] Error 139
make: *** [mandocs] Error 2
```

removing the reference to net_init.c makes it continue a bit further but it still ends up failing with these errors :

```
make[1]: *** [Documentation/DocBook/kernel-api.sgml] Error 1
make: *** [mandocs] Error 2
```

This is what I did :

```
diff -u linux-2.6.10-bk2-orig/Documentation/DocBook/kernel-api.tmpl
linux-2.6.10-bk2/Documentation/DocBook/kernel-api.tmpl
--- linux-2.6.10-bk2-orig/Documentation/DocBook/kernel-api.tmpl 2004-12-24 22:33:48.000000000
+0100
+++ linux-2.6.10-bk2/Documentation/DocBook/kernel-api.tmpl 2004-12-31 01:33:53.000000000 +0100

-!Edrivers/net/net_init.c
!Enet/core/dev.c
   </sect1>
   <sect1><title>8390 Based Network Cards</title>
```

Since I have very little knowledge about SGML or the building of these docs in general, I'd appreciate some help from someone more knowledgeable than me. Having to live without mandocs would be sad...

Linux-Kernel: make mandocs fails in 2.6.10-bk2
