I've run some tests with this card under Linux and done pretty well:

<http://www.supermicro.com/products/accessories/addon/DAC-SATA-MV8.cfm>

They also have a 3.0Gb version.

Not sure if that is AHCI, but it is eight port.

I got the drivers here:

<http://www.keffective.com/mvsata/FC3/>

The latest was mvSata\_Linux\_3.6.1.tgz as of 2005-10-13.

Hope that helps.
