Andrew, consider inclusion of the following patch into -mm for further testing, please.

---

This patch adds support for generic Hardware Random Number Generator drivers. This makes the usage of the bcm43xx internal RNG through /dev/hwrandom possible.

A patch against bcm43xx for your testing pleasure can be found at: <ftp://ftp.bu3sch.de/misc/bcm43xx-d80211-hwrng.patch>

Please merge with Deepak Saxena's generic RNG stuff, rather than duplicating efforts.

Jeff
