I'm sure Hannes will regenerate against upstream as well if necessary, however that depends on when this should be applied.

It's far too late and too intrusive for 2.6.16-rc.

It's #upstream or <null>.

Calm down. Of course I will regenerate is against #upstream. In fact, I've done so initially but wasn't sure what the status of libata-dev is. So I've diffed it against linux-git instead.

Updated patch to follow.

Cheers,

Hannes
