I'm seeing these in my logcheck output:

```
---  
Mar 27 16:16:45 king kernel: KERNEL: assertion (!sk->sk_forward_alloc) failed at net/core/stream.c (283)  
Mar 27 16:16:45 king kernel: KERNEL: assertion (!sk->sk_forward_alloc) failed at net/ipv4/af_inet.c (150)  
---
```

I also saw this with 2.6.14.5. I found references on LKML about this happening in 2.6.9 with regards to TSO and lowering tcp_tso_win_divisor. I'm not lowering any values via sysctl (that I'm aware of anyway), so I'm not sure if I should worry about this.

Just a heads up in case this is a real problem.

```
