When building pmac32_defconfig for arch=powerpc:

```
drivers/built-in.o(.text+0x74cd4): In function `pciserial_init_ports':
: undefined reference to `serial8250_register_port'
drivers/built-in.o(.text+0x74d88): In function `pciserial_remove_ports':
: undefined reference to `serial8250_unregister_port'
drivers/built-in.o(.text+0x74e70): In function `pciserial_suspend_ports':
: undefined reference to `serial8250_suspend_port'
drivers/built-in.o(.text+0x74ee0): In function `pciserial_resume_ports':
: undefined reference to `serial8250_resume_port'
```

Need to hunt down why this is happening.
