[PATCH] Janitor: drivers/net/pcnet32: fix incorrect comments

The comments concerning how the pcnet32 ethernet device driver selects the MAC addr to use are incorrect. A recent patch (in the last 3 months) changed how the code worked, but did not change the comments.

Side comment: the new behaviour is good; I've got a pcnet32 card which powers up with garbage in the CSR's, and a good MAC addr in the PROM.

Signed-off-by: Linas Vepstas <linas@xxxxxxxxxx>
