Hi Andi,

[resending with proper CC's].

Please apply this Calgary patchset. It fixes one bug ([https://bugzilla.redhat.com/bugzilla/show\\_bug.cgi?id=203971](https://bugzilla.redhat.com/bugzilla/show_bug.cgi?id=203971), should go to -stable as well) and makes several other updates all of which are safe for 2.6.19. Each patch has a detailed description.

Merged thanks.

It would be good if you could use a less weird patch format in the future though. In particular diffstat should be at the end and any other weird metadata too. And the Subject shouldn't be wrapped.

Hmpf, silly hg email. Will fix.

Cheers,  
Muli
