Hello,

when the ip\_tables module is loaded automatically when inserting the first rule, something gets screwed up, as `-L -v -n` shows:

```
17:39 ichi:~ # lsmod | grep ip_tables
17:39 ichi:~ # iptables -t mangle -A FORWARD -i eth1 -j MARK --set-mark 161
17:39 ichi:~ # iptables -t mangle -A FORWARD -i eth1 -j MARK --set-mark 161
17:39 ichi:~ # iptables -t mangle -L -v -n | grep eth1
p b targ pr opt in out src dst
0 0 MARK 0 -- eth1 * 0.0.0.0/0 0.0.0.0/0 0xa1
0 0 MARK 0 -- eth1 * 0.0.0.0/0 0.0.0.0/0 MARK set 0xa1
```

Everything is fine if ip\_tables was loaded before.

This box runs 2.6.18.5. Can anyone confirm this bug?
