I am getting this error when I try to compile 2.6.19 and 2.6.19.1.

I ran make mrproper and make menuconfig then ran make and got the below error.

```
HOSTLD scripts/kconfig/conf
scripts/kconfig/conf -s arch/i386/Kconfig
CHK include/linux/version.h
UPD include/linux/version.h
/bin/sh: -c: line 0: syntax error near unexpected token `('
/bin/sh: -c: line 0: `set -e; echo ' CHK
include/linux/utsrelease.h'; mkdir -p include/linux/; if [ `echo -n
"2.6.19.1 .file null .ident
GCC:(GNU)4.1.1 .section .note.GNU-stack,,@progbits" | wc -c ` -gt 64 ];
then echo "'2.6.19.1 .file null .ident
GCC:(GNU)4.1.1 .section .note.GNU-stack,,@progbits" exceeds 64
characters' >&2; exit 1; fi; (echo `#define UTS_RELEASE \"2.6.19.1 .file
null .ident GCC:(GNU)4.1.1 .section .note.GNU-stack,,@progbits`; ) <
include/config/kernel.release > include/linux/utsrelease.h.tmp; if [ -r
include/linux/utsrelease.h ] && cmp -s include/linux/utsrelease.h
include/linux/utsrelease.h.tmp; then rm -f
include/linux/utsrelease.h.tmp; else echo ' UPD
include/linux/utsrelease.h'; mv -f include/linux/utsrelease.h.tmp
include/linux/utsrelease.h; fi'
make: *** [include/linux/utsrelease.h] Error 2
```
