

[PATCH] export device_rename

Source: <http://linux.derkeiler.com/Mailing-Lists/Kernel/2007-02/msg10026.html>

- *From:* Johannes Berg <johannes@xxxxxxxxxxxxxxxxxxx>
 - *Date:* Wed, 28 Feb 2007 12:38:31 +0100
-

In wireless we'd like to allow renaming of the phy devices we surface in sysfs. The base wireless code, however, can be built modular and thus we need device_rename exported.

Signed-off-by: Johannes Berg <johannes@xxxxxxxxxxxxxxxxxxx>

Is this acceptable? For testing reasons we want the cfg80211 code buildable as a module.
