Alan Cox wrote:

The older AMD docs (CPU rev guide) list bit 31 of both 0x80000001 and 0x00000001 as 3dnow

All their example code/docs say to use 0x80000001

I don't have access to any AM2 systems, but the bit is definitely set on socket 939 Athlon X2 ("model 43").
