How's about this patch?

[PATCH] ide-pmac: fix pmac_ide_init_hwif_ports()

* pmac_ide_init_hwif_ports() can be called by ide_init_hwif_ports() (through ppc_ide_md.ide_init_hwif hook) for non IDE PMAC interfaces. If this is the case the hw->io_ports[] should be already setup by ide_init_hwif_ports()->ide_std_init_ports() so remove redundant code from pmac_ide_init_hwif_ports().

As side-effect this change fixes ctl_addr == 0 special handling in ide_init_hwif_ports().

* Fix misleading comment while at it.

I would have to try it. Problem is, I don't actually have any powermac with a PCI IDE controller at hand.. ouch. I'll see what I can find.

Ben.
