hm, i see no OOM messages in the diff – what am i missing?

best would be to run:

```
sort 2.6.24-rc5-patched > new.log
sort 2.6.24-rc5-new > old.log
diff -up old.log new.log
```

to remove line ordering issues.

Pasted the wrong diff – just wanted to feel normal about the day I guess.

Here is the right one –

2.6.24-rc5 is without patch, 2.6.24-rc5-new is with patch.
