Marco Costalba wrote:

Hi all,

new versions of Qt4 based qgit-2.1 and stable Qt3 based qgit-1.5.8 have been released.

Download tarballs from

[http://sourceforge.net/project/showfiles.php?group\\_id=139897](http://sourceforge.net/project/showfiles.php?group_id=139897)

Or directly from git repositories

[git://git.kernel.org/pub/scm/qgit/qgit.git](http://git.kernel.org/pub/scm/qgit/qgit.git) (qgit-1.5.8)

[git://git.kernel.org/pub/scm/qgit/qgit4.git](http://git.kernel.org/pub/scm/qgit/qgit4.git) (qgit-2.1)

Stable qgit-1.5.8 has only maintenance fixes, not a lot indeed, it happens to be already very stable.

New stuff is in qgit-2.1, you can find a detailed changelog at

<http://git.kernel.org/?p=qgit/qgit.git;a=shortlog>

After popular request, this time I have packaged qgit-2.1 in a nice Windows installer (Inno Setup based) downloadable from the above sourceforge link, so that our Window's friends can try qgit without worrying about compilers, Qt libraries and other geeky things ;-)

Window installer will ask you to locate the msysgit directory. Indeed msysgit is the only supported git distribution under Windows, because Cygwin has some issues and is also muuuch slower.

So the only prerequisite is to have already installed msysgit (<http://code.google.com/p/msysgit/>)

Happy new year 2008 !  
Marco

Hi,

I git-cloned qgit-2.1 from your repository, then ran `qmake qgit.pro`, but `make` gave me errors. Afterwards I deleted src/Makefile, ran `qmake-qt4 qgit.pro` and `make` starts compiling some files but the process ends with other errors.

This is the command line:

```
filippo@master:/usr/src/git/qgit$ make
cd src && make -f Makefile
make[1]: Entering directory `/usr/src/git/qgit/src'
make -f Makefile.Release
make[2]: Entering directory `/usr/src/git/qgit/src'

make: *** [sub-src-make_default] Error 2
```

I'm running Debian Etch 4.0 with vanilla kernel version 2.6.23.1 and I have the following packages installed:

```
filippo@master:/usr/src/git/qgit$ dpkg -l | grep qt4  
ii libqt4-core 4.2.1-2+etch1 Qt 4 core non-GUI functionality runtime library  
ii libqt4-dev 4.2.1-2+etch1 Qt 4 development files  
ii libqt4-gui 4.2.1-2+etch1 Qt 4 core GUI functionality runtime library  
ii libqt4-qt3support 4.2.1-2+etch1 Qt 3 compatibility library for Qt 4  
ii libqt4-sql 4.2.1-2+etch1 Qt 4 SQL database module  
ii qt4-dev-tools 4.2.1-2+etch1 Qt 4 development tools
```

what am I doing wrong?

Cheers.
