

## crypto/async\_tx/\* doesn't build on s390

---

- 

I get the following:

```
crypto/built-in.o: In function `do_async_xor':
async_xor.c:49: undefined reference to `dma_map_page'
async_xor.c:56: undefined reference to `dma_map_page'
```

This is mainly because s390 doesn't support DMA at all, but these files get selected via MD\_RAID456 anyway.

Any idea how to fix this?
