-

These are the first forty of about a hundred patches I have queued for 2.6.26. Note that a few will go through git-s390, maybe a couple through x86.git, and a few to 2.6.25-rc.

The ia64 patches are not included as they are being reviewed, but I hope to have them merged in time for the 2.6.26 merge window.

Happy reviewing!
