Hello everyone,

Btrfs v0.13 is now available for download from:

Hi Chris,

Following are two patches that allow btrfs-progs to build on ia64, and prevent a SEGV when trying to do a mkfs.btrfs.

I've gotten as far as successfully creating a btrfs filesystem (at least that's what btrfsck tells me), but haven't been able to mount it yet, probably because of the sector size issue.

Great, thanks I'll take these two. The kernel side needs the same hash.c fix, but I've already got that change made locally.
