When I try to install Amavis on Redhat 9 I get an error when I need to configure the package. This is my output.

```
[root@earth amavis-0.3.12]# ./configure
loading cache ./config.cache
/bin/date: relocation error: /lib/tls/libpthread.so.0: symbol errno,
version GLIBC_PRIVATE not defined in file libc.so.6 with link time
reference
checking for a BSD compatible install... /usr/bin/install -c
checking whether build environment is sane... sleep: relocation error:
/lib/tls/libpthread.so.0: symbol errno, version GLIBC_PRIVATE not
defined in file libc.so.6 with link time reference
yes
checking for mawk... no
checking for gawk... gawk
checking whether make sets ${MAKE}... yes
checking whether make sets ${MAKE}... (cached) yes
checking for a BSD compatible install... /usr/bin/install -c
checking for gcc... no
checking for cc... no
configure: error: no acceptable cc found in $PATH
```

What is wrong?
