Hello folks, when my radhat establish a connection to internet the default route is wrong, this would be the ip of my ISP, but the ip added is the same of my computer (192.168.0.1/0.0.0.0).

To solve this problem I delete the default route:

```
#route del default
```

after this stop and restart the adsl:

```
#adsl-stop
```

```
#adsl-start
```

and the default route is right.

what can I do to the default route be the right after start the computer?

=====

Saludos desde México
