Oh,

Am I a dope. Sorry, like I said I'm a newbie.

I did:

rpm -ivh gcc32-3.2.3-6.i386.rpm

and got

warning: gcc32-3.2.3-6.i386.rpm: V3 DSA signature:

NOKEY, key ID 4f2a6fd2

Preparing ##### [100%]

1:gcc32 ##### [100%]

I think I got it.

:|

then I did the same with my kernel sources (copied it from the 3rd Fedora disk) and rpm it.

:)

Yeah!

Do I need to do anything else?

I need all of this to compile a wi-fi driver SMC sent me.

Thanks everyone.

RedHat: Re: RH9 2.4.22 kernel source install trouble

Do you Yahoo!?

SBC Yahoo! – Internet access at a great low price.

<http://promo.yahoo.com/sbc/>
