Hi all:

I want to use gcc command to compile a C program. My OS is fedora 3. I download and installed following rpms successfully. But when I use gcc xxx.c the OS prompt "-bash: gcc: command not found". Any idea why this could happen?

Thanks for any idea.

binutils-2.15.92.0.2-5.i386.rpm

cpp-3.4.3-22.fc3.i386.rpm

gcc4-4.0.0-0.41.fc3.i386.rpm

glibc-2.3.3-74.i386.rpm

glibc-common-2.3.3-74.i386.rpm

glibc-devel-2.3.3-74.i386.rpm

glibc-headers-2.3.3-74.i386.rpm

glibc-kernheaders-2.4-9.1.87.i386.rpm

make-3.80-5.i386.rpm

Tommy
