Hello all..

I asked a while back if anyone had a heavy loaded syslog server and asked if they used a filesystem other than ext3 ..

well i fixed my own issue.. i changed over to syslog-ng..

system stats went from

load average: 1.99, 1.99, 1.99

and iostat

avg-cpu: %user %nice %sys %iowait %idle

0.72 0.02 0.36 46.19 52.71

to 0 load average and iowait to less than 1%

avg-cpu: %user %nice %sys %iowait %idle

0.40 0.00 0.75 0.21 98.64
