I think that you should check the terminal settings on the ssh client you are connecting from. You may not have the correct fonts on the local display. Or incorrect terminal settings. I have seen this numerous times, going between windows/solaris/linux/etc. If you could provide more details about the problem, perhaps we could provide a more detailed solution.

Regards,

Gavin McDonald

Subject: RE: Terminal emulation problem!!!

Hi,

I tried everything to get programs like "ntsysv", "elinks", etc... to display properly over an ssh session without success. I get a lot of weird characters even when I set LANG="en_US". Any suggestions will be greatly appreciated.
