Hi,

We have installed RHEL AS4 on a LPAR (Logical Partition) of IBM p550. I could not find the grub.conf or lilo.conf files in /etc. I could only find the following:

```
[root@bangpcplin3 etc]# ls -l g*.conf
-rw-r--r-- 1 root root 1756 Oct 22 2004 gpm-root.conf
-rw-r--r-- 1 root root 40 Nov 15 2004 gre.conf
-rw-r--r-- 1 root root 804 Nov 30 2004 gssapi_mech.conf
[root@bangpcplin3 etc]# ls -l li*.conf
-rw-r--r-- 1 root root 2374 Dec 5 10:15 libuser.conf
[root@bangpcplin3 etc]#
```

Thanks & Regards,

include the boot parameter in **kernel** line in **/etc/grub.conf** for grub
bootloader and **/etc/lilo.conf** for lilo boot loader . For a lilo boot
loader run **lilo** command also..

Re: Is there a file or something which I can edit for the linux kernelboot parameters?

Hi,

I want to boot a RHEL AS4 server with numa=off, kernel parameter. How do

I

automate this, so that I don't have to enter it at the boot: prompt.

Is there a file or something which I can edit for the linux kernel boot parameters?

Thanks & Regards,

–GnanaShekar–
