

Sorting out of sequence log Apache log file

Source: <http://linux.derkeiler.com/Mailing-Lists/RedHat/2006-04/msg00449.html>

Hello,

I had a hiccup with syslog/apache/logrotate recently and as a result some of the Apache log files are out of sequence. This is bad because Webalizer no longer recognizes the out of sequence lines and my reporting results are skewed.

Is there a command line util that will sort the records correctly? I've been looking around through Google without any luck so far.

(I'm on FC4 btw.)

Thanks,
Chris.
