cannot say about sending but mails received by every account on sendmail can be save in a certain mailbox.

assuming that you understand sendmail aliases correctly, I would suggest to put in /etc/aliases just the name of central mailbox along with original mailbox.

opesh:<tab character> opesh, mailbox@xxxxxxxxxxxxxxxx  
Mustafizur:<tab character> Mustafizur, mailbox@xxxxxxxxxxxxxxxx

Hope this helps

Hello,  
I am trying to setup a very simple rule:  
Every incoming or outgoing mail should  
be redirected to a central mail account,  
which will keep a copy of every mail thus  
sent or received.i am using RHEL AS3 & Sendmail.  
any help me
