bg & jobs commands

On 5/27/06, Elmian Shabahang <SH.Elmian@xxxxxxxxxxxxxxxxxxxxxx> wrote:

Hello,

How can I get list of background processes ? including commands followed by '&' or bg .

How can I know that which one are rinning in background?

I mean I need to have the list of background precesses, without foregrounds.

How should I filter the ps output?

Best regards,

Shabahang
