I'm running redhat 3 es, apache and all modules including mod_authz_ldap are from system rpm's; I'm attempting to restrict access to a directory and would like to use ldap authentication; below

is the relevant section of my httpd.conf file; I'm getting the box to enter my credentials when going to the web page, but it seems to be failing; any ideas? Thanks very much.

```
<directory /webroot/www/nessus_summary> AuthType Basic AuthName  
"Private Area"  
# AuthUserFile /usr/local/sbin/htusers AuthzLDAPEngine on  
AuthzLDAPServer "al-lnx-s11.preferredcare.org"  
AuthzLDAPBindDN "ou=users,dc=preferredcare,dc=org"  
#AuthzLDAPMapBase "ou=users,dc=preferredcare,dc=org"  
AuthzLDAPAuthoritative on  
AuthzLDAPSetAuthorization on  
Require valid-user  
</directory>
```
