Dear friend...
my name is bunty...
i'm new to the linux technology.,
but its quite interesting...
i'd like to know that what is the latest version of linux redhat and
whether it is suitable for the use as Operating System of my personal
computer...
or would anyone suggest which version of linux redhat is best suitable for
home use...?

.moreover id also like to know about the Fedora project..

i'd be highly obliged if you would help me out..

thanking you,
Sincierly Yours,
Bunty.

It's easy:

<http://fedora.redhat.com/>

You should use Fedora Core, the latest version is 5, you can download it using
the link above.

Regards,
Manuel.
