Hi Andrew,

Thanks – yes it is available in RH9, although it doesn't seem to list GNR as one of the manufacturers. But thanks for the tip anyway!

Try running the command "redhat-config-xfree86" I'm not sure it's available in RH 9, but it is in RHAS 3.

Hi Mark,

Thanks – sounds pretty straightforward, so I'll try it. Only thing is, I'm not sure about changing run level!

Hi andy

edit the configuration file "/etc/X11/XF86config"

In this you can find the Horizontal Sync and Vertical Sync settings

change the value in the configuration according to your

RE: Using flat-screen monitor with RedHat 9

monitor setting

Precaution : X configuration should be done in run level 3
and to test

it

change to run level 5

I'm trying to use a flat-screen monitor (GNR
TG700H) with RedHat 9. On
boot-up it fails at the login screen stage with
the message "out of
frequency" – but when I boot into Windows
XP it's fine! Is there a
setting I can change to make it work with
RH9, or is it a lost cause?

Andy
