I've downloaded the FC6 DVD ISO twice, now, and each time sha1sum comes back with a different hash than what is listed in the SHA1SUM file:

From SHA1SUM:

```
6722f95b97e5118fa26bafa5b9f622cc7d49530c FC-6-i386-DVD.iso
```

What sha1sum shows me:

```
f70d4f694f7eb6f19d2cfdd3bcf927ee1f01c29e FC-6-i386-DVD.iso
```

I've had enough coasters burned because of bad checksums. Can anyone tell me...do I have a bad download with my ISO, or is the checksum not correct in the SHA1SUM file?
