I have been testing RHEL5 WS doing clean installs and upgrades from RHEL4.4. It appears RHEL5 workstation has some issues when doing an upgrade from RHEL4.4 WS. I get a lot of missing dependencies when running the yum update command. I even installed a clean version of RHEL4.4 with everything selected to install. I then upgraded that install to RHEL5 WS. Even trying to install individual packages fails. Below is the output yum gives me after grabbing updates from RHN.

```
--> Running transaction check
--> Processing Dependency: libgfortran = 4.1.1-52.el5 for package: gcc-gfortran
--> Processing Dependency: gcc = 4.1.1-52.el5 for package: gcc-gnat
--> Processing Dependency: libstdc++ = 4.1.1-52.el5 for package: gcc-c++
--> Processing Dependency: postgresql-libs = 8.1.4-1.1 for package: postgresql-devel
--> Processing Dependency: bind-libs = 30:9.3.3-7.el5 for package: bind-devel
--> Processing Dependency: wireshark = 0.99.5-EL4.1 for package: wireshark-gnome
--> Processing Dependency: libmudflap = 4.1.1-52.el5 for package: libmudflap-devel
--> Processing Dependency: libstdc++ = 4.1.1-52.el5 for package: libstdc++-devel
--> Processing Dependency: postgresql = 8.1.4-1.1 for package: postgresql-devel
--> Processing Dependency: libgcj = 4.1.1-52.el5 for package: gcc-java
--> Processing Dependency: libgcj = 4.1.1-52.el5 for package: libgcj-devel
