I try http, ftp and nfs installation getting same error.

My yum repository working very well no issue at all.

I am installing thru tree of RHEL5. (I tried to attached the png snapshot but due to size limit it is under moderator.

The xend.log is as follow.

```

```

What is to be done ????

I have attached the png image of the error.

Re: rhel5 xen guest installation problem

Did you try to install the guest into image file or arbitrary disk partition? Is your SELinux turned on?
Please check /var/log/xen/xend.log, xend-debug.log files.
