Hello All,

I have installed the JDK 1.5 and Tomcat on Linux, When I start the Tomcat the memory utilization of tomcat is 40MB and after some clicks its increase to 45 mb and then its keep increasing but in windows it doesnot happen even if the tomcat in idle condition the memory goes down but in linux case its not flush the memory size, could any one please tell me what is the right solution.

at Starting time :

```
[retaildriver@Centos ~]$ ps -eo  
rss,pmem,pcpu,comm,user | grep java  
41296 4.0 0.0 java retaildriver
```

After some time 2 hr or in idle condition :

```
[retaildriver@Centos ~]$ ps -eo  
rss,pmem,pcpu,comm,user | grep java  
82243 8.2 0.0 java retaildriver
```
