Doh!

Silly me...

Thanks very much!

:)

Subject: Re: RHEL5 kernel-headers

I think your looking for is the kernel-devel package. up2date -i kernel-devel or yum install kernel-devel should work just fine depending on which version of red hat you are using.

The sources will then be under the /usr/src/ directory.

Romeo

Does anyone know why there isn't yet a kernel-headers rpm package for RHEL5's x86\_64 version?

Just wondering, because I seem to need it to get my test lab laptop's wireless card to work (via NDISWrapper).

Thanks.

Johan
