thanks so much for your attention!

No problem.

what is the name of the server?

btw, you **will** need some firewall rules.

also, can you give me the output of:

nmap localhost (if you have nmap installed)

John

Can you:

1. tell me the name of the server, so I can 'take a look'
2. tell me the output of iptables -L -n

Regards
John
